

Are Your Servers Optimized?

Virtualization Assessment by RTS

Utilizing VMware's industry leading assessment tools, we can show you how virtualization can greatly benefit your datacenter!

How can you get more out of your IT infrastructure without adding to your overhead?

Just like all of the Fortune 100 companies, you can tap into the benefits of virtualization. Some of these benefits include:

- > reduced datacenter costs
- > increased hardware and application availability
- > enhanced operational flexibility
- > improved security, business continuity, and disaster recovery
- > higher system and energy efficiency

Why work with RTS?

RTS has a team of highly experienced VMware virtualization consultants that can deliver the highest caliber assessment of your IT infrastructure. We can provide the VMware Consolidation Estimate (CE) for FREE, and if needed, the more detailed Capacity Assessment (CA) can be executed efficiently and quickly. These assessments can give you the information you need to see why virtualization makes good business sense for your specific environment.

Why VMware?

VMware is recognized as the global leader of business infrastructure virtualization with numerous partnerships and awards. It makes sense to partner with the best.

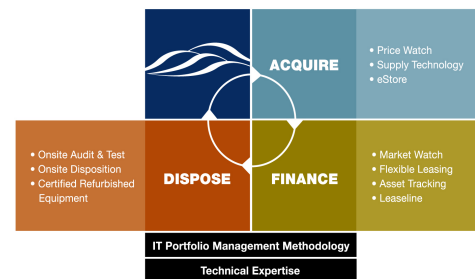

What will you get from the study?

Fully documented VMware assessment report with detailed analysis, charts, data, and actionable recommendations for your datacenter.
